PROJECTS :

<https://github.com/Ashfaquemp/Farmer-Management-System>

FARMER MANAGEMENT SYSTEM

Farm Management System project in java is a web application where a user can search and view the Information using this system. Users can search the Information of their choice according to the requirement online so it will be easy for users. The complete process of Farm Management will be managed online. There is no need to maintain the record manually This Project is performing all the crud operations like EDIT/UPDATE/DELETE functions. Following the MVC architecture to manage the view part in JSP and handling the Server-side request, it's using servlet and MYSQL as backend.

Technology:

Spring Boot, CSS, MySql, Apache Tomcat v9
